

## **ENVIRONMENTAL POLICY**

Our policy is the continuous effort to protect the environment, which comprises the following aspect:

- The prevention of pollution and the reduction of environmental repercussions that derive from the activities of our Company.
- The continuous improvement in the concretisation of our environmental objectives incorporating all the activities of production into the commonly accepted environmental models and harmonising these with the fundamentals of Sustainable growth.

For the fulfilment of these goals we proceed with the following actions:

- We are fully complied with all relative legislative requirements, adopting the Best Available Techniques (BAT) that technology offers in our sector to the extent that these are enterprising feasible.
- We minimise the emission of pollutants and wastes to the environment, we decrease, limit, recover, recycle and reuse the solid wastes, which are produced in our site, limiting as possible the wastefulness of natural resources. At the same time, an endless effort takes place in order to ensure on a daily base, that the rejection of our non-reusable wastes is done in a secure way and with the minimum of consequences to the environment.
- We try to enhance the environmental sensitization of our suppliers as well as the reduction of environmental repercussions of our products throughout their life cycle, until they are rejected from the final consumers.
- All our paper suppliers are FSC certified.
- Our effort is supported and applied by all our personnel, which attends at the most optimal degree to locate the probable dangers of environmental pollution.
- We promote the growth of mutual collaboration relationships with all social institutions, thus contributing decisively to the implementation of measures for the continuous improvement of environmental protection.

In conclusion, we would like to make clear, that VIS S.A., in her long-lasting course in the paper packaging sector, had and continues to have, a leading part in the Environmental Management by developing occasions, which promote and raise the spirit of care and love for the natural space in which every human activity is created and developed.
